Founder(s): VTP Brno, a.s.
Owner(s): VTP Brno, a.s.
Operator(s): VTP Brno, a.s.

Type of entity: joint-stock company

Criteria for acceptance of innovation firm: 1. Innovative potential/product/service
2. For BI the company must exist no longer than 3 yea

Description of the park

Introduction

TITC, the Science and Technology Park that is runned by VTP Brno, a.s., is located within the area of VUT Brno that is easily accessible from Brno's traffic circle, which is directly connected with D1 highway and airport, while Brno is strategically located at the crossroads of major Czech highways. It is also possible to come by tram no. 12, that has its final stop nearby our park, or by bus no. 53, which stops right opposite our building.

We offer fully equipped spaces, chemical and heavy laboratories and storage spaces. Provided the required conditions are met, the business incubator's spaces can be used in an advantaged mode for start-up companies.

Description of technology transfer

Our park is an expert and advisory institution that helps to realize and speed up the technology transfer (TT), i.e. to transfer the outputs from science and research activities into a commercial form, which is presented by the innovative business. Our clients have already performed 2 technology transfers - one was performed by Acam Solution s.r.o. in the field of industrial automation and development (power supplies for VUT Brno) and the second transfer was performed by Brno Solar Park a.s. - a swirl turbine for VUT Brno - Faculty of engineering, Energy institute,

Fluid engineering department of V. Kaplan).

Innovative entrepreneurship training

The company's key objectives are to create the conditions for innovative business within our region and for using the research outputs in business with an emphasis on high-tech. It brings together the science and creative potential of VUT Brno, MENDELU and MASARYK's university and the innovative commercial environment, both domestic and foreign.

TITC provides counseling in an area of technology transfer, education and support in the innovation business and runs Business Incubator (BI) that is designed for technologically oriented start-up companies.

Advisory services

TITC offers comprehensive service in the area of technology transfer, project start-up and management. It includes the support in choosing the appropriate grant program in order to encourage the investment, including help with a complex processing of project application including the counseling with public procurement. Further, the counseling service in an area of business plans for start-up companies, grant guidance and management, protection of intellectual property and venture capital are provided.

Innovation infrastructure

Development of cooperation among the business, universities and research institutes, creation of the environment for support of innovative business. Direct link to the regional scientific research centers that are being built up (CEITEC, Group CEITEC MENDELU, AdMaS, NETME) with a possibility of using their outputs, research results and specialized equipment (in a cooperation with universities and scientific institutes). We also offer a possibility of using the heavy and chemical laboratories, including the simulation of work environment.

Cooperation with universities

Cooperation with the universities while profiling their curricula and educational programs, support of graduates and communication among the scientific research institutes, universities and industry.
