Enterprise Europe Network is your gateway to competitiveness and innovation. Wherever you are in Europe, you can gain access to all the information you need to develop your business and to find the right partners. Services are specifically designed for small and medium enterprises (SMEs) but are also available to all businesses, research centres and Universities across Europe. The Enterprise Europe Network is made up of close to 600 partner organisations in more than 40 countries, promoting competitiveness and innovation at the local level in Europe and beyond.

Open up possibilities

6<sup>th</sup> European brokerage event,  
25<sup>th</sup> and 26<sup>th</sup> Sep. 2008

Micronora, the international microtechnological trade fair will take place in Besançon (France) from 23<sup>rd</sup> to 26<sup>th</sup> September 2008. The last fair brought together 990 exhibitors and welcomed 15 000 professional visitors.

Organised with the support of Enterprise Europe Network in the framework of Micronora, the 6<sup>th</sup> European brokerage event is targeted at companies, technical institutions and research laboratories offering innovative technologies and know-how or looking for technological solutions. The aim of this event is to encourage confidential meetings between technology developers and technology users in order to foster technical cooperation in the field of micro & nanotechnology. It is not only open to exhibitors but also to visitors.

The brokerage event is the place to meet technological partners in the heart of an industrial and highly specialised trade fair. In 2008, several clusters will be present.

## A real opportunity to

- » meet and discuss product development, manufacturing, licensing or other similar technological partnerships,
- » find partners to build a solid base from which to approach new markets,
- » make international contacts to promote innovative technologies and know-how,
- » find ideas or technologies as innovation boosters,
- » become informed about the latest technological trends and research activities,
- » initiate technology transfers.

## The previous event in a nutshell

### An International...

Participants from Switzerland, Sweden, Germany, Belgium, The United Kingdom, The Netherlands, Austria, Italy, Poland, Spain and France.

### ... and industrial event

90 % companies

### 320 highly targeted meetings

The quality of the meetings is more important than the number. Sometimes only one meeting can be fruitful. Early technology profiles submission gives participants a concrete overview of the kind of partners they will be able to meet.

### An event that leads to real partnerships...

## ))) Technologies

**Microsystems and components design**  
*Software, design, CAD*

**High resolution manufacturing processes**  
*Nanoimprint, E-beam, ion-beam etching, micro-machining, photolithography, thin films.*

**Micromanufacturing and microsystems manufacturing processes**  
*Integration, encapsulation, micro-injection, packaging and connecting technologies, micromanipulation, micro-assembly.*

**Characterisation and microscopy**

**Materials**  
*Piezo-electric materials, ceramics, polymers, semi-conductors, shape memory alloys, nanopowders, nanoparticles, nanocomposites.*

## ))) Applications

Microelectronic and optical components

Micromechanical components  
Sensors  
Actuators

Implantable Microsystems  
Biological sensors  
Microvalves  
Lab-on-chips, biochips  
Medical imaging

Nanosystems NEMS  
Microsystems, MEMs, MOEMs,  
Micromotors  
Micromachines

Surface treatment  
Coatings, barrier coatings,  
biocompatible coatings

Micro fuel cells

## ))) Industrial sectors

Biomedical

Automation and robotics

Automotive

Aeronautics and space

Electronics

Instrumentation and non destructive testing

Optics

Clock and watchmaking industry

Luxury

Measurement and inspection

Optics

Glass

Spectacles

Telecommunications

Energy

Sharing  
to innovate,  
develop  
and reach  
new markets

## ...The previous event was a success

Participants were highly satisfied with their participation. Over time, companies or research laboratories that succeed to engage cooperation after the event, increased in size.

“  
*Lovalite is the designer of a new generation of optical micro-components. During this event we not only met customers but also development partners.*

Lovalite

*Stalice Santé regularly attends brokerage events organised by the network. We have forged several partnerships with foreign companies to integrate new technologies or to manufacture and put on the market new biomedical products.*

Stalice Santé

*Attendance enabled us to make a successful bid for a FEMTO INNOVATION tender by combining our expertise with that of Venfroid.*

Vegatec

”

# Individual registration form

» Please complete this form and return it to:

ARIST – CRCI de Franche-Comté  
Enterprise Europe Network  
Anne-Marie Vieux  
Valparc – Zac Valentin  
F-25043 BESANÇON cedex  
Fax: +33 3 81 80 70 94  
amvieux@franche-comte.cci.fr

» You can also register online through our website

[www.micro-nano-event.eu](http://www.micro-nano-event.eu)

After your registration, you will be required to submit technology offers or requests that will be presented online. The earlier you submit this, the better chance you stand of being selected and well-identified by other participants.

Participants will be informed when they can make their meetings selections in the month preceding the event.

Your participation gives you access to the evening organised in Besançon on 25<sup>th</sup> September 2008.

For any further information, do not hesitate to contact us or your local Enterprise Europe Network correspondent.

## Payment terms

Your participation will be effective only after receipt of your payment:  
€180 including VAT (€90 including VAT for Micronora exhibitors).

Payment by cheque or direct deposit to the account owner:
