Description of the park

Introduction

The Science and Technology Park of Palacky University in Olomouc (VTP UP) provides office and facility leases, consulting services and the use of the equipment and know-how of Palacky University with favourable terms. Through the Business Incubator we help start-up entrepreneurs in starting a business with a unique idea and plan. VTP UP is focused on providing financial, patent and grant advice. VTP UP has been a bridge between the scientific and business world since 2000.

VTP UP is a self-sustaining economic unit of Palacky University in Olomouc. It directly benefits from the facilities and know-how of the University and passes these benefits onto its clients.

Thanks to its focus, VTP UP is an important regional partner for the Regional Office of the Olomouc region, and the city of Olomouc.

Description of technology transfer

We provide high quality technology and knowledge to businesses in Olomouc thanks to support of Palacky University. We work mainly with companies in the fields of pharmacy, chemistry, biotechnology, optics, nanotechnology and others.

Our offer to companies:

- * Excellent scientists and their teams
- * High-End equipment
- * Top-equipped laboratories

Examples of successful technology transfer:

QuitaOnline

Olomouc scientists have created a web application to analyze large amounts of data, it represents a new generation of datamining

Quickly process and analyze large amounts of text and data. This is the new QuitaOnline web application created by the team of Dan Faltýnka from the Palacky University of Technology in Olomouc.

The QuitaOnline web application does not require a deeper knowledge of mathematics, statistics, programming or quantitative linguistics. Easily sorts data, creates charts and analyzes. Thanks to its user-friendly interface, it's easy to work with it.

Interested people can try QuitaOnline web app and then purchase it at www.quitaonline.com.

UNITRAP

Scientists at Palacky University have developed a magnetic separator

Unique laboratory aid was developed by Palacky University scientists. The UniTrap special separator can be used for magnetic separation, magnetic particle research or laboratory diagnostics. A similar device developed by a team led by Karel Koberny of the Institute of Molecular and Translation Medicine was not yet available on the market. It is offered to interested customers despite e shop. The technology is licensed to the company ([LABICOM](#)).

Innovative entrepreneurship training

We create inspiring, creative and friendly community of students, businessmen and entrepreneurs from Olomouc region

- * We are a place where members come to meet and communicate openly.
- * We organize lectures, seminars and discussions with the most interesting people in the business.
- * Through our networking and educational activities we help members with their internal as well as business growth.

Advisory services

To entrepreneurs with interesting business idea we offer help with the start of business, feedback on the business plan and contact sharing.

For selected projects we additionally have UP Business Catapult program.

Each company has its own consultant, who discusses the area in question and together you are looking for workable solutions to individual problems.

Innovation infrastructure

Science and Technology Park at Palacky University in Olomouc offers 2747 m² of business space in two buildings for rent.

Advantages of renting with us:

- * Part of the industrial zone Olomouc - Šlechtitelů (total area of the site is 16.8 hectares)
- * Expertise and know-how of Palacky University
- * Easy connection to the city bypass and highway D1 (Prague - Brno - Ostrava)
- * Free parking

In addition to the standard lease we also offer shared co-working space and placement of your headquarters in a virtual office.

Block A - 1707 m2

- * 8 multi-purpose rooms - laboratories

Block B - Business Incubator - 1040 m2

- * 19 offices
- * 2 pilot plants
- * Virtual office
- * Training room

Blok C - Business incubator 2 - 1337 m2

- * 26 offices
- * 22 laboratories
- * pilot plant

Cooperation with universities

You too can have the latest scientific knowledge and cutting-edge technology that enables you to gain a decisive advantage over the competition and help you get to the top. Be inspired by our satisfied customers and take advantage of the opportunity of unique cooperation with Palacky University in Olomouc!

EOLA

Reg.nr.: 47670100

EOLA s.r.o. delivers a professional solution for delivering technology to automated operations across industries. The main activities of EOLA s.r.o. are complex technological solutions in the field of control systems, robotic workplaces, single-purpose devices. The company is a certified integrator of technologies - STAUBLI, COGNEX. Provides design, projection, production, recovery, training and service delivery. The company specializes in optical methods of image measurement and processing of digital cameras - so-called machine vision. These CCTV systems are increasingly being used in virtually all areas of the industry, whether as a control device on the production line or as a stand-alone test device in the lab. As a development contractor, EOLA integrates a range of technical and science disciplines such as electronics, optics, optometry, information technology, engineering, which always brings INNOVATIVE SOLUTIONS for its customers.

MedChemBio, z.s.p.o.

Reg.nr.: 72023970

The MedChemBio cluster lab provides quality control services for medicines, active ingredients, starting materials and intermediates. At the request of the clients, it is possible to develop and validate analytical methods at MedChemBio. Existing laboratory equipment allows for both conventional and special physicochemical analyzes such as liquid chromatography, gas chromatography, infrared spectroscopy, titration and a whole range of analytical assays. The MedChemBio lab employs workers who have many years of experience working in good manufacturing practice in the pharmaceutical industry. The Laboratory has MZCR's permission to handle some drug precursors. The MedChemBio Laboratory is a contract laboratory of Teva Czech Industries

Monitoring RC System

Reg.nr.: 04627563

RC System s.r.o. develops and supplies systems for satellite tracking and vehicle search, also called vehicle monitoring. Customers also make extensive use of refueling and fuel scuffing systems, which, thanks to sophisticated fuel tanks in tanks, guard diesel and, in the event of theft, inform owners of predetermined telephone numbers. Another way to control costs is to read data from the

vehicle control unit (CAN BUS) or to install the flow meter.

Ústav experimentální botaniky Akademie věd České republiky

Reg.nr.: 61389030

The Institute of Experimental Botany of the Academy of Sciences of the Czech Republic (IEB AVCR) was founded in 1962. At present it has 14 laboratories located in Prague and Olomouc. The Institute carries out basic research in plant biology, namely in plant genetics, physiology, phytopathology and biotechnology. It is also active in applied research. In plant genetics, projects focus on pollen molecular genetics and plant functional genomics. The Institute cooperates with many research institutes and universities in the Czech Republic and abroad. The IEB scientists are taught at several Czech universities, and students of these schools work out their bachelor, master's and doctoral theses. The Institute of Experimental Botany also involves high school students as part of the Open Science project and is active in popularizing science among the general public.
