Description of the park

Introduction

The Centre of Textile Technologies and Education is oriented to the area of textile finishing. It is aimed mainly to transfer new technologies and to develop new environmentally friendly textile finishing processes to keep competitiveness of the Czech textile industry.

CTTV has strong links to educational institutions (TU Liberec, Pardubice University, SSIS Dvůr Králové n.L.), some employees are consultants for diploma theses and some theses are conducted directly in CTTV.

CTTV is involved in the processing of the Regional Innovation Strategy of the Hradec Králové region, CTTV initiated participation of KHK in the project CROSSTEXNET - 7.FP EU ERA NET program and it cooperates closely with the region on this project.

Companies located in CTTV participate currently in 7 projects supported by the EU in the 7th FP EU, they present the results of their work at international conferences and exhibitions.

In the past, the cooperation of companies in CTTV led for example to the development of machine for the production of contact lenses under the leadership of Prof. Wichterle or to the development and industrial application of biotechnological methods for pretreatment of textiles, replacing aggressive chemicals.
