Park location on the map: [here](#)

Reg.nr.: 45354774
Director: Ing. Luděk Šantora, MBA (santora@bic.cz)
Deputy: Bc. Václav Kudlič

Operating data of the park

Membership in STPA: YES
State of the park: accredited
Partner in project SPINNET: NO
Launch day: 1.1. 1997

Founder(s): BIC Plzen, City of Plzen, University of West Bohemia
Owner(s): BIC Plzen, City of Plzen
Operator(s): BIC Plzen

Type of entity: Limited company (Ltd.)
Criteria for acceptance of innovation firm: innovative and technology oriented company

Description of the park

Introduction

The Pilsen's Science and Technology Park is a crucial development project initiated and implemented by the City of Pilsen. It is located in one of the most successful industrial zones in the Czech Republic, at the Pilsen-Borská pole Municipal Industrial Park near the University of West Bohemia.

Over 10,000 m² of office, semi-industrial and laboratory facilities form a modern infrastructure that support research, development and innovation. The Pilsen Science and Technology Park benefits from its very convenient location with direct motorway connections to Prague and Germany (Nuremberg). Its proximity to and opportunities to collaborate with the University of West Bohemia are also essential with regard to the use of research capacities and availability of qualified staff.

BIC Plzeň was established by the City of Pilsen in 1992 to support the development of business innovation in the region. The services of BIC Plzeň are primarily targeted at small to mid-sized innovation businesses and include areas such as supporting the establishment of new technology-focused firms, assisting the development of existing firms, helping companies find and obtain financing for development projects, getting companies involved in national and European programmes, supporting the introduction of innovation at companies, helping to identify suitable

partners for development, production and business and providing information and consultation on doing business in the EU.

Space in the BIC Plzeň incubator and technology centre have been available to clients since 1996. It was a first step in the long term process of the development of the science and technology park in Pilsen.

Further on the company Vědeckotechnický park Plzeň, a.s. was established in 2005. 4,500 m² of new space were built in 2008. This significantly expanded and improved Pilsen's infrastructure for supporting research, development and innovation.

The next stage in developing of the innovation infrastructure was the opening of new buildings with a total area of over 6,000 m², built by the City of Pilsen as part of the "Pilsen Science and Technology Park II" project with support from the Prosperita Operational Programme Industry and Enterprise's Prosperity programme. These new offices, laboratories and semi-industrial space have been open to innovation businesses since 2012.

Since 2014 newly developed facilities of the park have been available. The park offers nowadays more than 10 000 m² of office, semi-industrial and laboratory space.

Consortium of BIC Plzeň and Vědeckotechnický park Plzeň a.s. operates the entire science and technology park. BIC Plzeň provides also specialized advisory services for innovative companies. When providing services, BIC Plzeň leverages its international partnerships gained through membership in leading business and innovation support networks.

One of these is the Enterprise Europe Network, in which BIC Plzeň collaborates with over 600 partner organisations, mainly within Europe but also beyond. BIC Plzeň is also a member of the the EBN, a network of around 150 quality-certified EU|BICs (business and innovation centres) and the Science and Technology Parks Association of the Czech Republic.

Description of technology transfer

BIC Plzeň provides services to support the transfer of knowledge and technology. It is therefore using its long-standing working links and cooperation with research organisations in the region. At the same time, it uses knowledge of the business community and the needs of specific innovative companies. BIC Plzeň consultants also have knowledge of programmes to support research and development not only at national but also at international level.

Innovative entrepreneurship training

BIC Plzeň participates in events aimed at entrepreneurial education. A significant target group is students. Examples of such events include motivational seminars for University of West Bohemia students, the Innovation Marathon (an exercise in innovative techniques, but also a new form of finding innovative solutions to specific corporate intentions), start-up weekend events or the evaluation of students' business plans in ZČU projects, etc.

BIC Plzeň consultants provide guidance to students, student teams and PhD students who are considering starting a business based on commercializing the results of their development projects, thesis and dissertation.

Advisory services

- Assistance for businesses in obtaining grants
- Business plan consultancy

- International R&D collaboration services
- Technology transfer assistance services
- Consultancy on doing business in the EU
- Support of cooperation between universities and companies

Innovation infrastructure

BIC Plzeň provides active support not only of regional but also of national innovation infrastructure. It participates in expert or working group meetings, collaborates on activities of other partners related to entrepreneurship, innovation and international cooperation.

Cooperation with universities

BIC Plzeň is a signatory to the Partnership and Cooperation Agreement for the Development and Operation of the Science and Technology Park Plzeň.

All the partners in this agreement declare a common will to cooperate with each other in the development and operation of the Science and Technology Park as a regional platform to promote the support, location and development of innovative companies, support technology transfer activities, and engage ZČU's capacities more massively in R&D commercialisation projects.
