Owner(s): Tomas Bata University in Zlin, Regional Government (Region Zlin)

Operator(s): Technology innovation centre Ltd.

Type of entity: Limited company (Ltd.)

Criteria for acceptance of innovation firm: request + business plan

Description of the park

Introduction

Technological Innovation Center s.r.o. (TIC) was founded in 2005 by the Zlín region together with Tomas Bata University with the aim of supporting the innovation ecosystem in the entire region. Since its foundation, TIC has been gradually developing its services, activities and projects. Today we can say that it is progressive for the client agency creating and implementing the Regional Innovation Strategy of the Zlín Region and promoting the quality of life in the Zlín Region focusing on studies, business and professional growth.

Currently, TIC builds on the following pillars:

Creativity and entrepreneurship in pupils and students

Acceleration of business plans, including the operation of a business incubator

Services for small and medium-sized enterprises, especially in the domains of specialization of the Zlín region

Support of research and development in companies with effective cooperation with research organizations

Services for streamlining human resources management, including career counseling and career guidance

Support for the expansion of endogenous companies in the Zlín region

Quality of life in the Zlín region

TIC operates the building of Business Innovation Centre Zlín, the site is owned by the Statutory City

of Zlín, The TIC operates it on the grounds of contract on loan and Zlín is a partner of the whole project. Premises are mostly of office nature and some 5500 m² of area is available, while leasable area is roughly half. A part of premises is determined for emerging enterprises which are involved in so called incubation program. Remaining part is used by innovation enterprises in the regime of Technology Park and a part of premises is determined for institutions for enterprising support. Rent involves basic technical and administrative services, such as housekeeping, security of common premises, access to the internet and services of receptions. There are meeting rooms and training hall available of capacity up to 130 persons. The building also included vegetarian dining room and café and other restaurants are in close area. A part of premises is furnished.

Description of technology transfer

TIC transfer activities are built on the following pillars:

- a) Membership in the Council for Commercialization of TBU.
- b) Realization of TIC's own research activities. The key R&D project was Design of a model of metropolitan areas of the Czech Republic affected by depopulation (No. TL03000525) supported by the TAČR Éta program.
- c) Participation in the preparation of other R&D projects, especially those classified as Applied Research and Experimental Development.
- d) Consultation of R&D activities mainly in endogenous SMEs, or incubated start-ups.

Innovative entrepreneurship training

We implement education and community building in the following fields:

workshops for secondary school students, excursions in the business incubator, etc.

Business Academy course at the secondary school – www.podnikatelskaakademie.info

Business Accelerator – My First Million www.mujsprvnimilion.cz

Business Academy course at TBU Zlín

program CREATINN

Innovation infrastructure

The Zlín region has one of the most numerous and developed infrastructures for building a welcoming innovation environment in the entire Czech Republic. This infrastructure includes a wide range of services related to starting a business to services for established entrepreneurs, e.g. connecting companies with research institutions, international cooperation, technology transfer, expert consulting services or education. In the Zlín region, there is a unified presentation of the offer of support services for entrepreneurs, students or the public. This is the ZLINNOVATION platform, which concentrates services and informs about them through the website www.zlinnovation.cz.

Cooperation with universities

Work with students, optional subject Business Academy, cooperation within the My First Million business accelerator,
Tomas Bata University in Zlín is one of the owners
technology transfer support
joint projects
membership and cooperation within the Zlinnovation platform

Type of cooperation:

common project

Description: According to the European youth employment policy, there is a strong call for entrepreneurship education and training and support for young people to start entrepreneurship. The project aims to initiate a systemic change in the field of business education support in the pre-incubation phase in Europe and also to prepare a set of tools that can be international, since youth unemployment is undoubtedly a European issue.

The aim is to create several outputs, firstly to design and develop an assessment tool that will measure entrepreneurial potential and the improvement of entrepreneurial skills and abilities during students' studies. Another output of the project is the creation and management of a communication platform for students interested in entrepreneurship. The next, third output will be the creation of a methodology for communication tools, i.e. the optimal way to communicate initiative, creativity and entrepreneurship at the university. The last output will be case studies of student business projects in individual partner countries - in the Czech Republic, Poland and Spain.

The project is led by Tomas Bata University in Zlín. Partners are Technological Innovation Center Zlín, Uniewersytet Szczecinski and Universidad Catolica Santa Teresa de Jesus de Avila. The non-profit partner is member of the EU Parliament Michaela Šojdrová.
